

5     WHAT IS CLAIMED IS:

1.     A liquid laundry detergent composition contained within the water-soluble body for release upon the dissolution of the water-soluble body, the composition comprising:
  - 10           -- at least two layers, said at least two layers comprising in total:
    - i.     from about 5 to about 90% of a detergent surfactant; by weight of the composition;
    - ii.    from about 5 to about 50% of a colored inorganic electrolyte, by weight of the composition; and
    - 15           iii.   from about 1 to about 85% of water, by weight of the composition.
  2.     The composition of claim 1, wherein the composition further comprises a hydrotrope.
  - 20           3.     The composition of claim 1, wherein the composition further comprises a dye.
  4.     The composition of claim 1, wherein the detergent surfactant in the composition comprises a mixture of an anionic and a nonionic surfactant.
  - 25           5.     The composition of claim 4, wherein the ratio of the anionic surfactant to the nonionic surfactant is from about 10:1 to about 1:10.
  - 30           6.     The composition of claim 1, wherein the volume ratio of the first layer to the second layer is from about 10:90 to about 90:10.
  7.     The composition of claim 1, wherein the composition is packaged within a transparent container.

5 8. The composition of claim 1, wherein the composition is transparent.

9. The composition of claim 1, further comprising a third layer.

10. The composition of claim 1, wherein the third layer is a layer of capsules or  
10 emulsion.

11. A liquid laundry detergent composition comprising:  
-- at least two layers, said at least two layers comprising in total:  
15 i. from about 5 to about 90% of a detergent surfactant; by  
weight of the composition;  
ii. from about 1 to about 50% of total electrolyte, by weight  
of the composition, the electrolyte comprising a colored  
inorganic electrolyte and another electrolyte selected from  
the group consisting of an additional inorganic electrolyte,  
organic electrolyte, and mixtures thereof, and  
20 iii. from about 1 to about 70% of water, by weight of the  
composition.

12. The composition of claim 11, wherein the composition further comprises a  
25 hydrotrope.

13. The composition of claim 11, wherein the composition is transparent.

14. The composition of claim 11, wherein the composition is packaged within a  
30 transparent container.

15. The composition of claim 11, wherein the electrolyte comprises from about 0.001  
to about 10% of the colored inorganic electrolyte.
